Accounting solutions on the Macintosh

$$$$$$$

A guide to selling and marketing accounting solutions for small businesses

Apple Computer Australia Pty Ltd

Sapphire

Combing the user friendly interface of the Macintosh and the powerful database features on the new 4th Dimension II, Sapphire is the ideal accounting tool for your company office. This is true multi-user software with multi-company licenses also available. Sapphire is easily setup and maintained, and frees your accountant from chasing through months of figures, to give the vital advice he is there to provide you and your business. Your staff enter all the documentation at the workplace and by using immediate information you can control cashflow and become aware of problems before they reach crisis proportions. All data is available on screen or in printed reports and queries are on-line. Sapphire gives you the flexibility and power to create as many searches, sorts, reports and custom calculations and graphs as you wish. Training is minimised because Sapphire has been designed for the workplace. Fully tested by New Zealand and Australian accounting firms, Sapphire is the 1989 New Zealand top award winning package. Full multi level security, importing and exporting, Sapphire comes with full General Ledger. Debtors, Creditors, and General Ledger can be run in different periods.
