COMPANY PROFILE
mySAP Financials provides an integrated solution that improves the bottom line by letting your company process and interpret financial data more effectively. It delivers company-wide control and integration of financial information, which is essential to strategic decision-making.

mySAP Financials supports your entire capital investment process. Meet your financial objectives. Monitor progress. Manage portfolios and contracts. And most importantly, keep yourself in the blank.

SAP is the world's leading provider of collaborative e-business software solutions. Through the mySAP.com platform, people in business around the globe are improving relationships with customers and partners, streamlining operations, and achieving significant efficiencies throughout their supply chains.

Today, more than 13,000 companies in over 100 countries run more than 30,000 installations of SAP software. With subsidiaries in over 50 countries, SAP generated sales of EUR 5, 11 billion in the fiscal year 1999. The company is listed on several exchanges including the Frankfurt stock exchange and NYSE under the symbol "SAP". Additional information is available at www.sap.com

COMPANY PROFILE
At Sapphire One Pty Ltd, there is a determination to seek new and creative ways of addressing all aspects of Accounting, while holding a deep respect for individuals' needs inside and outside the company and for the communities of which they are a part.

That is why we have developed SapphireOne, a completely Australian GST compliant, Back-End Financial Management Application that has the ability to be as simple or as complex as your business requires.

Founded in 1986, Sapphire One is a 100 per cent Australian owned and developed Financial Management Application created to provide a flexible and comprehensive solution for your business. With a client base that covers countries such as Australia, New Zealand, Hong Kong, Singapore, USA, England, Vietnam and China, and is continually growing, SapphireOne has become the result of our team's commitment to produce a reliable, cost-effective business solution with after care service.

SapphireOne has a proven track record, providing a comprehensive and accurate, yet efficient and versatile Financial Management system to our user base. It also provides an integrated solution that equips your company with the ability to search, sort and report any information which you may require.

Through working closely with our customers, we understand the growing needs that companies have and aim to incorporate many of our clients' requests into our software. This has been a successful strategy, benefiting our clients as much as ourselves and creating an enticing list of standard features.

We also understand that security is an important issue for most businesses, and we have created a system where user access can be set to one screen only or full access to the whole network, any combination of screen can be set, making life easy for your casual users.

We have worked hard to create a dedicated and skilled team to spearhead our after sales support, ensuring that you will have a stress-free transition to SapphireOne.

Systems integration

At Sapphire One, we understand the importance of total commitment to after care service. To ensure that we deliver the best possible service to our clients, we offer three Support Plans, Diamond, Ruby and Amethyst. Diamond and Ruby Support Plans are suitable to the Client/Server customers. Amethyst provides a cost effective solution for the single user customers.

The opportunity to receive onsite implementation and training from one of our friendly and experienced consultants is also available.
