Let Sapphire take your business to new heights

Get more freedom to build your business with this outstanding financial management system from Sapphire.

KEY BENEFITS

- Flexible reporting and analysis
- Easy access to data for manipulation
- GST/PAYG compliant
- E-commerce capable
- Low maintenance and cost of ownership

There's more to a good financial management program than day to day admin. This dynamic program gives you sophisticated reporting and analysis, export/import flexibility, and slick BAS/GST capabilities so you're free to concentrate on opportunities for growth. Send the reply card today!

Software for hard decisions

Your financial software could be restricting your business growth. You need to be able to deal swiftly and efficiently with BAS; analyse and report on any aspect of your operations; effortlessly retrieve data from a full historical record ... Sapphire V6.5 R4 does all this and much more, with full capability to help your local or worldwide market expansion. With Foreign Currency and Export/Import Manager function, and complete Costing and Inventory Control, it means business.

Sapphire V6.5 R4 includes automated BAS and E-BAS, reconciling historical Business Activity Statements and supporting Calculation Sheets with unlimited history, simplifying lodgements and reducing your GST administration time.

Reports when and where you need them

You can only act confidently from good information, and Sapphire helps you find and access good information quickly and efficiently. Every field and file can be reported on, sorted, queried and searched. Formats can be simple column based or in full graphical form, and ODBC links with products such as Excel means well presented, concise and accurate data. Sapphire V6.5 R4 helps you effectively control and manage your business - so you can get on with real growth. ■
