

Sapphire 5.1 – Client/Server

KEY BENEFITS

- ✓ Perfect for mixed systems
- ✓ All business functions
- ✓ Internet/Intranet links built-in
- ✓ Extremely powerful

It's so frustrating! You go looking for an accounting program and find so many only operate on a unified system. And if your system is mix-and-match, with a bit of Win 95 here, a bit of Win NT there and some Mac OS thrown in for good measure, you have to give some of the new accounting whiz-bangs the thumbs-down. Well, say hello to Sapphire 5.1.

Integrated business information

A comprehensive client/server double entry financial management system, Sapphire is platform-independent, so you can run a mixed system with Windows NT, Win 95 and Mac OS running side by side. In other words, it's what you've been waiting for. Send in the reply-paid card now! Sapphire has an integrated data base that enables it to utilise a range of management

Look for us at The Australian Technology Expo sponsored by The Australian Newspaper at the Melbourne Qantas Domestic Terminal during 1998 - Sapphire Year 2000 compliant

features and perform accounting functions over a wide range of industries - agriculture, advertising, banking, construction, law, mining, manufacturing, publishing and retailing, to name just a few.

You're in control

When you use Sapphire 5.1 you're logging on to a program that has credibility - on the market since 1987, it's been polished and perfected. It's also versatility-plus. Not only is it multi-tasking with full archive back-up and retrieve, it also has dynamic Excel link, unlimited history, speedy data entry, and gives you all staff on-line. If you're running an empire, Sapphire allows Internet and Intranet connections with full control over who has access, and what data can be read or updated. Use world wide web forms, Java, Javascript or direct TCP/IP to make the connections using Microsoft Explorer, Netscape, Office 97 or any other browser-based products.

Here's what you get!

Sapphire is not purchased by modules, so you get everything in the one hit. The package comes complete with Accounts Receivable, Accounts Payable, General Ledger, Cash General Ledger, Inventory, SOE, POE, Quotes, Requisitions, Excel Link, Apple Events, Time Sheets, Retentions, Project Budgets, Projects, Front Office, Project General Ledger, Contracts, Diary, Payroll, Fixed Assets, Resources, Remote Access and much, much more! ■
