It's so frustrating! You go looking for an accounting program and find so many only operate on a unified system. And if your system is mix-and-match, with a bit of Win 95\98 here, a bit of Win NT there and some Mac OS thrown in for good measure, you have to give some of the new accounting whiz-bangs the thumbs-down. Well, say hello to Sapphire 6

Sapphire Version 6

Now Sapphire allows you to deal with the world on their terms and in their figures, and have your information in your terms, so you can see how the numbers stack up with what ever currency you wish to view your financials in.

Version 6 of Sapphire expands on the functions of Version 5, to not only contain all the normal functions required to run a business, but to now include Foreign Currency and Manager.

Foreign Currency allows Sapphire to handle any transaction in different currencies and to automatically do the adjustments required. Manager is a complete 'Management System', that not only assembles information into common groups for easy tracking, but also encompasses To-do functions and a Diary Organiser. Manager can be configured for Importers, to help in the tracking of goods and all the functions required to support this.

Version 6 has also added new functions to make life easier and faster, allowing the tuning of areas you use, and hiding what you don't, keeping the system as simple as possible and giving maximum usability.

Here's what you get!

Sapphire is not purchased by modules, so you get everything in the one hit. The package comes complete with Accounts Receivable, Accounts Payable, General

Ledger, Cash General Ledger, Inventory, Sale Order Entry, Purchase Order Entry, Quotes, Requisitions, Excel Link, Apple Events, Time Sheets, Retentions, Project Budgets, Projects, Front Office, Project General Ledger, Contacts, Diary, Payroll, Fixed Assets, Resources, Remote Access, Foreign Exchange, Multiple General Ledgers, Importer Manager, Exporter Manager, Thin Client, Back to Back Ordering, Formula Pricing, Auto Serial Creation and much, much more! ■
